

SZABOLCS GELLÉNY – CURRICULUM VITAE

I work in the Peptide-Based Vaccines Research Group at the HUN-REN Research Centre for Natural Sciences. My main focus is on targeting dendritic cells with peptides for vaccine delivery. I am involved in the synthesis and characterisation of peptides and drug delivery polymeric systems. I am currently a MSc student in Chemistry at ELTE TTK.

Degree and qualification:

- BSc (2024) in Chemistry – Eötvös Loránd University, Budapest, Hungary

Positions and workplaces:

- 11/2022- to date: student, Institute of Materials and Environmental Chemistry, HUN-REN Research Centre for Natural Sciences

Research expeditions and courses:

- 06/2023 – 08/2023: Erasmus+ traineeship. Synthesis of urea derivatives with Molybdenum catalysators, Organometallic Laboratory of the Inorganic and Organometallic Architectures, Centro de Química Estrutural, Instituto Superior Tecnico, Universidade de Lisboa
